EXPERIENCE

GTM & Automation Consultant, Freelance *Jan 2026 – Present*

- Build Clay sourcing and enrichment systems for client outbound: LinkedIn engagement capture, Shopify Plus store qualification, dual-source recruitment scraping, and multi-provider email waterfalls
- Captured 1,306 LinkedIn post interactions into one structured table, resolved each to a full profile, then ran email enrichment across stacked providers with verification before send
- Built a recruitment pipeline for a German market client pulling live roles from LinkedIn and Indeed into one deduplicated feed, 4,402 postings enriched with company firmographics and named HR decision-makers
- Ran cold email infrastructure end to end on Instantly: domains, SPF/DKIM/DMARC, warm-up, rotation, sequencing, and reply triage. 1,164 prospects sequenced, 4 opportunities, $28,000 in pipeline. Peak 60% open rate
- Audited and rebuilt CRM architecture and lead nurture workflows in GoHighLevel, driving a 19% uplift in lead-to-client conversion for one client

Founding Operations, Dough.do (US, remote) *May 2026 – Jul 2026*

- First operations hire at a US consumer brand launch platform, working directly with the founding team
- Sourced and shipped 30+ products in three months across fragrance, supplement, and food categories
- Ran outreach and commercial negotiations with 200+ global manufacturers across email, WhatsApp, and Alibaba, securing pricing, MOQ, and production terms
- Built the supplier database and sourcing systems from scratch, replacing scattered Slack threads with a single source of truth the team used for decisions
- Shipped a Slack-to-Notion supplier lookup agent using Make and the Claude API, removing a recurring bottleneck nobody had asked me to fix

Founding Team, Head of Partnerships, Playpreneur *Apr 2025 – Oct 2025*

- Built the partner and client pipeline from zero at an entrepreneurship hub for teenagers, with no existing list, warm intros, or brand recognition
- Closed a partnership with NFTE (Network for Teaching Entrepreneurship), the largest global youth entrepreneurship organisation; a team from the hub went on to win NFTE's World Series of Innovation
- Segmented messaging across three distinct buyers (students, parents, institutional partners) after a single pitch failed to land with any of them

Project Trainee, International Banking, HBL *Oct 2025 – Jan 2026*

- Researched cross-border payments and remittances at Pakistan's largest bank, analysing stablecoins and blockchain payment rails and drafting recommendations to leadership on speed, cost, and transparency in formal remittance channels

Listing Partner, Biconomy *Apr 2025 – Sep 2025*

- Owned the ZigChain exchange listing end to end: outreach, exchange documentation, and coordination through to launch

Influencer Marketing, RedotPay *Feb 2025 – Apr 2025*

- Signed and managed 10+ KOLs for a crypto payments company's Pakistan market entry, prioritising audience fit over follower count in a market with low brand trust

SKILLS

GTM: Outbound Prospecting, Lead Sourcing & Enrichment, Cold Email Infrastructure, Deliverability, Pipeline Generation, Partnerships, Vendor Negotiation
